

BEYOND SUSTAINABILITY

Since 1906, our founders' vision to contribute to the sustainable development of rural communities in Colombia has been driving our company's growth.

Proudly, we have preserved our values through time, thanks to the commitment and trust of employees and partners who have become part of our family.

Furthermore, as a company with strong ties to cocoa-growing communities in Colombia and true to our purpose, we have created The Chocolate Dream, our sustainability plan with a long-term vision to improve well-being, protect the environment, and increase the income of producers and communities, prioritizing the protection of children, women and young people across Colombia.

Going Beyond Sustainability, means we build long-term relationships with employees, small grower associations, and the communities so that, through chocolate, we can create together a more prosperous future based on their particular context and needs.

OUR OBJECTIVES

Strengthen the social well-being

Increase the income of the small producer

Work in balance with the environment
